The GAMS World web site aims to bridge the gap between academia and industry by providing highly focused forums and dissemination services in specialized areas of mathematical programming.

GLOBAL World focuses on computational methods that find the 'very best' (global) solution to nonlinear optimization problems.

It is the purpose of the GLOBAL World site to bring together people who work in the emerging area of global optimization.

GAMS

We are interested in practical software, testing, comparison, and quality of solvers, research in both solution methods and in good model formulations, and in improving the communication between people interested in these topics.
