The GAMS World web site aims to bridge the gap between academia and industry by providing highly focused forums and dissemination services in specialized areas of mathematical programming.

MPEC World focuses on Mathematical Programs with Equilibrium Constraints (e.g. bilevel programs and leader-follower games).

It is the purpose of the MPEC World site to bring people working in the emerging area of MPEC models together.

GAMS

We are interested in practical software, in testing, comparison, and quality of solvers, in research in both solution methods and in good model formulations, and in improving the communication between people interested in these topics.
